

QUICKBOOKS SEARCH NOT WORKING

In QuickBooks search feature, you can search transaction, vendor, customer, company file, and any type of desired data. This time you may "not be able to use the search option" in QuickBooks.

Causes

QuickBooks Search Index file damage

Using Outdated versions of a QuickBooks

Windows OS registry issue

Due to Firewall or Security

Steps to Fix QuickBooks Search Not Working

Change the Name of QuickBooks Search Index File

- ➔ Press Windows Start button
- ➔ Type *.SearchIndex
- ➔ Locate qbw.SearchIndex Folder
- ➔ Add .old at the end of the folder name
- ➔ Reopen QuickBooks Desktop
- ➔ Click the search icon tab
- ➔ Update Search Information option
- ➔ Click OK
