

QUICKBOOKS SLOW

Sometimes QuickBooks Desktop users face the error **QuickBooks running slow** or unable to start.

CAUSES

- Company file name too long
- Company file damaged/corrupted
- QBWUSER.INI file corrupt/damaged
- Outdated QuickBooks Desktop
- Your system does not meet the minimum requirements to run QBDT

POSSIBLE STEPS TO FIX QUICKBOOKS WON'T OPEN COMPANY FILE

1 Update QuickBooks

- Go to the Help menu
- Update QuickBooks Desktop
- Update Now tab Get Updates
- Restart QuickBooks
- Install the new release.

2 QuickBooks Install Diagnostic Tool

- Go to Intuit website
- Download the QuickBooks Install Diagnostic Tool
- Save the file in local Desktop
- Open and run QBInstall Tool
- Run the QuickBooks Install Diagnostic Tool
- Restart your computer
